

## MIZ OKI 3.0

Autonomous Business Intelligence

# Security & Compliance Brief

Built for boards, CISOs, and regulators

Traceable • Explainable • Governed

### Full decision traceability

Inputs sensed, reasoning paths, scores, action taken, and outcomes—captured for every decision.

### Explainable reasoning paths

Why an action was selected, alternatives rejected, and how confidence and risk were weighted.

### Human-in-the-loop governance

Autonomy is permissioned: advisory, approval-required, or autonomous—by policy and threshold.

### Role-based access control

Granular permissions, separation of duties, and accountable approvals.

### Immutable audit logs

Tamper-resistant logs for regulated environments and incident response.

### Deployment control

Run on your cloud or ours. Maintain data boundaries and governance policies.
